WORKING EXPERIENCE

People's Bank - Trainee Chasier

📅 2017 (January–August)   📍 Kandakettiya Branch

I worked in People's bank as a cashier. During that time, I was able to deal with the bank faithfully and maintain account holder's privacy.

PROJECTS

LinkedIn Job Apply BOT.
This is done by **Python** using **Selenium Test Scripts** and Automatically Login and Apply for the First Job..

Air-Quality Checker.
A web application that shows the air quality according to the included zip code. This uses the **API** provided by AirNow. The **django framework** is used for the backend.

A Level.
This is a **cross-platform mobile application** that allows students to register and then read lessons related to their A / L subject. You can also add lessons to the relevant user. The **Flutter Framework** and **Firebase Authentication** are used for user registration

Amazon Price Tracking BOT
Here, the **Web Scraping** process tracks the price of the product. The Bot checks at specific time every day and will sent **an email and an SMS** to the phone when the price arrive at the desired price. This uses the **Python SMTP** Package to send email and the **Twilio Service** to send SMS.

COVID-19 Tracker.
This is an Android App created using the **Flutter Framework**. Here you can see the latest Statistics of Covid 19 in Sri Lanka. For this the details are obtained through the **API** provided by HEALTH PROMOTION BUREAU in Sri Lanka

USJ FOSS - (On Going).
This is a website created for the Foss community of Sri Jayewardenepura University. Events posted by the community are posted here. It uses the **React Web framework** for the front-end and the **django framework** for the back-end. **PostgreSQL is used as the database** here. The front-end and the back-end are connected by an **API**.
